

Use any rubric—just upload a PDF

Maintain your existing assessment standards by uploading your current rubrics directly into the platform. Sapient Clinician automatically applies your criteria to generate consistent, objective feedback aligned with your specific learning objectives and institutional standards.

Overall Performance Summary

Your performance demonstrated a solid grasp of the core clinical features of acute pericarditis, and you appropriately linked the patient's history and diagnostic findings to your diagnosis. You engaged the patient respectfully and were able to obtain a focused history and exam. Your workup planning and treatment formulation with first-line medications indicate sound clinical decision-making; however, opportunities exist to refine your differential discussion, er

Clinical Decision-Making • Proficient (4/5)

Strengths:

- Your decision to order an EKG, echocardiogram, and relevant labs demonstrated a systematic approach to confirming the diagnosis of pericarditis.
 - Evidence: Ordering of an "Echocardiogram" with findings of a small pericardial effusion (Transcript)

Areas for Development:

- Clarify and expand your treatment plan by discussing with the patient the risks and benefits of the treatment.

High-quality, personalized, and actionable feedback

Transform assessment from a time-consuming task into a powerful learning tool. Our AI system analyzes the complete interaction transcript to provide detailed, personalized feedback that highlights strengths demonstrated during the clinical encounter, identifies knowledge gaps requiring additional study, and suggests communication improvements.

Educators can review and edit AI-generated feedback before release, ensuring quality while dramatically reducing grading time.

Ready for classroom implementation out of the box

Deploy immediately with our comprehensive classroom management system that includes course creation with easy student enrollment via link or email, assignment management for distributing scenarios to specific learner groups, progress tracking with detailed analytics on student performance, and complete transcripts of every patient interaction for thorough review.

No additional software required—everything you need to transform clinical education is included in the platform.
